---

Third-year Integrated Master of Science in IT student at Silver Oak University with hands-on experience from involvement with ECELL. Proficient in backend development with Java and frontend development using HTML, CSS, JavaScript, and React. Skilled in applying IT concepts to address real-world challenges, including project management, teamwork, and strategic planning. Eager to leverage academic knowledge and practical experience to contribute effectively in a professional setting.

---

## Strengths and Expertise

### Technical Skills:

- Java Backend (Spring Boot, servlet, JSP, Hybernet)
- Frontend Development (HTML, CSS, JavaScript, React)
- Database Management (MySQL, Postgres)
- Python, c, c++

### Technical Tools:

- AWS (Amazon Web Services)
- Version Control (Git, GitHub)
- RESTful APIs
- Unit Testing and Debugging

### Soft Skills:

- Innovative Problem-Solving
  - Dynamic Team Collaboration
  - Agile Adaptability
  - Engaging Communication
- 

## Professional Experience

### Silver Oak University

### ECELL (Entrepreneurship Cell) Member

August 2022 - Present

- **Event Coordination:** Organized and managed tech and entrepreneurship events, honing leadership and organizational skills.
- **Workshops and Seminars:** Assisted in planning and executing workshops on entrepreneurship and technology, gaining experience in public speaking and event management.
- **Team Collaboration:** Collaborated with a team to promote entrepreneurship on campus, demonstrating effective teamwork and strategic planning.

### Freelance Projects

### Freelance Developer

-June 2023 - Present

- **Hotel Management System:** Developed a comprehensive web application for hotel management using Java for backend and React for frontend, improving booking and management processes.
- **Wiz Learns:** Created an educational coding website named Wiz Learns using HTML, CSS, and JavaScript, designed to facilitate coding education and enhance user learning experiences.
- **Small Projects:** Built various smaller projects utilizing JavaScript, enhancing skills in frontend development and problem-solving.

## Academic Projects

### Capstone Project

-August 2023 - Present

- **Web Application Development:** Led a project to develop a web application using Java for backend and React for frontend, demonstrating strong project management and technical skills.
- **Coding Competitions:** Participated in coding challenges and hackathons, improving problem-solving skills and technical expertise.

### Skills in depth:

- **Java Development:** Proficient in backend development with experience in building scalable applications.
- **Frontend Development:** Skilled in HTML, CSS, JavaScript, and React, with a focus on creating responsive and interactive user interfaces.
- **AWS:** Basic knowledge of AWS services and cloud computing.
- **Version Control:** Familiar with Git and GitHub for collaborative coding and version management.
- **Problem-Solving:** Strong analytical skills developed through project work and coding challenges.
- **Team Collaboration:** Effective in team settings, demonstrated through academic projects and ECELL involvement.
- **Adaptability:** Quick to learn and adapt to new technologies and project requirements.
- This version clearly showcases your relevant projects, detailing your technical skills and achievements.
